## **DETAILED ACTION**

### ***Status of Application***

1. Amendment filed 9/22/2010 has been received. Currently claims 1-16 have been amended and are pending for prosecution.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "each of pillars of a greenhouse" is not a correct phrase and furthermore the pillars are not positively recited, therefore lack antecedent basis.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3635

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Spoar et al (US 3,902,280) in view of Shannon (US 2,541,784)

Regarding claims 1, 4, 7 and 10, US'323 teaches of a roof frame comprising a horizontal frame (See multiple layers, 14, Fig. 2) comprising a frame, with a rectangular main beam (20) arranged thereon (See both 24s that are parallel upper and lower chords) and vertical members therebetween (See vertical member, above leader 28, Fig. 2, which lies on both sides just not pictured) and a principal rafter (40) that is coupled to the main frame on both sides of the main beam (20). Regarding the intended use of the structure being a greenhouse, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex Parte Masham*, 2 USPQ2d 1647 (1987). US'280 fails to disclose pillars, however discloses supporting walls of the structure. However it would be obvious for one of ordinary skill in the art at the time of the invention to modify a roof system to sit on top of an alternate support such as the pillars, as disclosed by US'784 (See 10, Fig. 1). One would be motivated to make a modification because, pillars,

Art Unit: 3635

studs, walls, etc are all interchangeable features in supporting structures of a building or frame and most often than not carry the load of a roof. Swapping one out for another yields no unexpected result.

Regarding claim 2, 5, 6, 8, 9, 11 and 12, US'784 teaches of the pillars at the corners (See 10, Fig. 1, at corner). Also see horizontal members 15, pinned to pillar 11 by plate 14, Fig. 3) at the four corners.

Regarding claim 3, US'280 teaches of covering material (See 50) supported by end gables (Col. 2, lines 63-67).

Regarding claims 13-16, the above claims teach of all of the structural limitations of the framework, as claimed, therefore inherently teach of the method steps that do not specifically indicate any distinguishing building method, rather describe the same structural limitations as listed in the apparatus claims.

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3635

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
